

## Savvy FAQ's

How quickly will it act and how long does it last?

While most self-tanning products claim to last only 4 - 7 days, Savvy Sunless will provide a 5 - 9 day tanning effect. Customers will experience immediate results provided by a bronzer in the solution. A golden tan will start appearing within hours of application with maximum darkening developing within 24 hours. The tan color produced by DHA is temporary and will gradually fade as dead skin cells rub off. Because it's formulated in combination with Erythrulose, the tanning process develops slower, penetrating deeper into the skin before the DHA reacts, producing a longer-lasting sunless tan.

Will it work with my equipment?

Savvy Sunless works in any spray tanning booth and hand-held equipment. Salon owners are reporting excellent results in Mystic Tan, Magic Tan, other spray tan booths, and hand-held airbrush sprayers. If you're not sure if it will work for you, ask for a sample of Savvy Sunless and give it a try.

Why does it smell so good?

The subtle "cherry almond" aroma pleasantly surprises customers. Through an effective combination of stable formulation and odor encapsulates, Savvy Sunless has reduced the "starchy" odor from other leading formulas giving customers a refreshing fragrance and enjoyable experience.

Is it safe?

The American Academy of Dermatology recommends sunless tanning as a safe alternative to sunbathing. The active ingredient DHA (dihydroxyacetone) does not damage the skin and is approved for cosmetic use by the Food and Drug Administration. Like most sunless tanning products, it does not contain a sunscreen and, therefore, does not protect skin from sun damage.

How should it be stored?

Savvy Sunless solution should be stored in an airtight container at temperatures below 80 degrees. Storing your solution

between 60-70 degrees is ideal. Refrigeration is not harmful to your solution.

What are customers saying about Savvy Sunless Solutions?

Customers are giving the product rave reviews. Visit our testimonials page to find out what about the positive results salon owners are getting from Savvy Sunless Solutions.
