

## Professional Sunless Tanning Solutions

Welcome to Savvy Sunless Solutions. We offer quality sunless tanning solution for the professional sunless tanning and airbrush tanning industries. Our premium UV-free tanning spray works in any spray tan booth, hand held sprayer, airbrush machine, spray gun, and HVLP system.

Business-savvy salon owners use Savvy to give their customers the longest lasting and most natural looking cosmetic tan without exposing them to ultraviolet (UV) rays. More people are choosing not to use sunshine or UV-tanning devices, but still want the healthy looking glow of a golden tan. Tanning salons and spas nationwide are using Savvy Sunless to give their customers instant sun-kissed, darker skin and a deep dark full color within 24 hours. The sunless tanning is perfect for social events, evening out tan lines, or as a booster between traditional tanning.

This site offers current information about Savvy Sunless, the industry, and links to valuable resources to help you manage your business.

Savvy Sunless Solutions continually invests time and effort to stay abreast of the current technology and trends. We demonstrate our commitment to your success by offering superb value and service.
